

MARKET RENT ASSESSMENT AND OPINION

207 Main Street, Amagansett

Commercial Market Rent Assessment: Complete Edition

Prepared for the owner of 207 Main Street, Amagansett, NY 11930 (SCTM 300-171-1-18)

Prepared October 7, 2026. Market evidence as of October 7, 2026.

This edition contains:

- Part I. Assessment and opinion letter: the conclusion, its basis, how it differs from the earlier October 2026 analysis, how each item of the research brief was answered, the verified subject facts, the negotiating positions, the tenant-argument review, limitations, next steps and the landlord decision page.
- Part II. The complete Commercial Market Rent Assessment memorandum (35 pages, unabridged): subject property, lease economics, market overview, 23 comparables, executed transactions, historical evidence, adjustment grids, three-method market rent calculation, sensitivity tables, negotiation analysis, tenant arguments and responses, 131 graded sources with URLs, and research limitations.

Confidential. Not an appraisal. Prepared for the landlord's negotiation use. Market rent figures are ESTIMATES based on adjusted asking rents and inference from the subject's own 2017 key-money lease assignment: no executed Amagansett commercial rent is public for 2014–2026, and the 1,100 SF area, lease type and expense responsibilities are unverified. Every assumption that drives the result is stated so that a reviewer can substitute alternatives.

PART I

Assessment and Opinion

1. The opinion

Question. Is the current rent of \$5,000 per month (\$60,000 per year) for 207 Main Street, Amagansett, below, at, or above fair market rent, and what evidence can the landlord defend if the tenant asks for a reduction?

Answer: BELOW MARKET, moderately. On the evidence assembled, the market rent for these premises is estimated at **\$60 to \$72 per square foot per year on a triple-net (NNN) base-rent basis**, which at the broker-reported 1,100 SF is **\$5,500 to \$6,600 per month**. The best-supported midpoint is **\$66 per square foot, or \$6,050 per month**. The current rent of \$54.55 per square foot is about **17% below that midpoint** and about **9% below the low end** of the range. If the existing lease is a gross lease rather than NNN, the shortfall on a like-for-like basis is about 25%.

Confidence is Low on the dollar range and better on the direction. No executed Amagansett rent is publicly disclosed for 2014 to 2026, so the range rests on adjusted asking rents and on inference. The direction of the finding is supported independently by the \$575,000 to \$625,000 key money asked for this exact leasehold in 2016 and 2017, by the "almost triple" renewal offer made to an Amagansett Square restaurant in 2021, and by low post-2020 vacancy across the East End.

What the evidence does not support. It does not support the \$65 to \$85 per square foot range (\$5,958 to \$7,776 per month) stated in the earlier October 2026 analysis, and it does not support a claim that the rent is dramatically below market. A tenant's broker could rebut the earlier figures with the closed Napeague lease at about \$40 per square foot, the 194 to 547 days the two headline Amagansett asks have sat without a cut, and the subject's own physical limitations. The revised range is lower, but it is defensible.

2. Basis of the opinion, in order of weight

#	Evidence	Type	Grade	What it shows
1	The 207 Main Street leasehold itself: marketed December 2016 at \$625,000 key money (later \$575,000) for the "long-term lease" and equipment; assigned to Organic Krush June 12, 2017 at an undisclosed price. Brokers called it one of a "finite number of permitted wet uses" and reported "several serious inquiries" in a day.	Executed (price undisclosed)	A- / C	A buyer paid a large premium to step into this lease. That is consistent only with a contract rent already below market. Capitalized over 10 to 20 years at 10%, the key money alone implies a rent gap of roughly \$5,600 to \$8,500 per month, though part of the premium bought equipment and the scarce wet-use status.
2	74A Montauk Highway, Amagansett: 2,830 SF turnkey restaurant, 126 seats, 31 parking spaces, renovated 2020. Asking \$240,000 per year plus NNN (\$84.81/SF) plus \$700,000 key money; the \$175,000 seasonal option for May 22 to September 15, 2026 has lapsed. About 194 days on market with no cut.	Asking	B	The only Tier 1 Amagansett restaurant offering. After adjustment for its superior parking, kitchen, condition and size, and for a 10% ask-to-achieved discount, it indicates \$76.33/SF for the subject.
3	11 Indian Wells Highway, Amagansett: first	Asking	B	Main Street district dry space. Adjusted, the first

#	Evidence	Type	Grade	What it shows
	floor 2,480 SF at \$65/SF plus NNN; ground floor 2,877 SF at \$35/SF plus NNN; second floor 2,844 SF at \$50/SF plus NNN. 33-space lot. First-floor listing up about 316 days.			floor indicates \$69.03/SF for the subject.
4	2095 Montauk Highway, Napeague (Amagansett 11930): 4,476 SF restaurant shown by Compass as rented June 8, 2025 at \$180,000 per year base plus \$40,000 NNN (\$40.21/SF base, \$8.94/SF NNN). Compass flags the price "Unverified". White box with an apartment, off the hamlet core.	Executed (unverified)	B-	The only closed Amagansett food-service lease. It is the lowest indicator and needs a +23% net adjustment to reach the subject; adjusted it indicates \$49.46/SF.
5	17 S Edison Street, Montauk: 2,729 SF turnkey restaurant, about 126 seats, \$156,000 plus NNN (\$57.16/SF) plus \$250,000 key money.	Asking	B	Strongest non-Amagansett restaurant comparable; adjusted it indicates \$61.36/SF.
6	Qualitative executed-market events: Hampton Chutney offered "almost triple" its rent at Amagansett Square in 2021 and left (Doubles took the space by July 2022); 177 Main Street sold for \$4.45M in January 2023, 60% above its 2020 price, and Rowdy Hall opened there; a Saunders broker told WWD in 2026 there have "not been many vacancies" since COVID; the East Hampton Star reported a west-end "business boom" in July 2026.	Executed / press	B / C	The hamlet's food-service space re-lets, landlords have pricing power, and demand for Amagansett locations is active.
7	Trophy retail asks (136 Main St Unit 1 at \$192/SF; East Hampton Village and Sag Harbor at \$145 to \$240/SF).	Asking	B / D	Shown in the comparables table for completeness but excluded from the restaurant conclusion. They would overstate the subject's market rent.

3. How this differs from the earlier October 2026 analysis

The earlier workbook and memorandum concluded a \$65 to \$85 per square foot range and a \$75 per square foot balanced benchmark (\$6,875 per month). This assessment revises that downward. The reasons are set out so the landlord can see why the earlier figures should not be presented to the tenant.

- **It relied on asking rents alone.** It had no executed data and did not examine time on market. Both headline Amagansett asks have sat for 194 to 547 days without a price reduction, which argues for an ask-to-achieved discount rather than taking the asks at face value.
- **It did not account for key money.** The 74A ask carries \$700,000 of key money and the subject's own 2017 assignment carried \$575,000 to \$625,000. Key money is part of the economics of both and changes the comparison in different directions: it raises 74A's effective rent, and it is the strongest evidence that the subject's contract rent was below market.

- **It did not find the one closed Amagansett food-service lease.** 2095 Montauk Highway leased in 2025 at about \$40 per square foot base. It is a weak comparable, but a tenant's broker would cite it, and the analysis must answer it rather than ignore it.
- **It treated 136 Main Street at \$192 per square foot as a benchmark.** That is a 500 SF prime end-cap retail unit, and the broker page for it has since gone dark. It is trophy retail, not restaurant space.
- **It made no subject-specific adjustments.** The subject has a kitchen "not much bigger than a bathroom", a documented repair history, no on-site parking and an undersized nonconforming lot. Against the Tier 1 restaurant comparable these cost about 35 percentage points of adjustment, partly offset by the subject's smaller size and pedestrian position.
- **It did not verify the subject.** This assessment confirms the parcel, owner, property class, assessment, taxes, lot size, historic designation and zoning use table from government records, and states plainly that the 1,100 SF figure is broker-reported and unconfirmed.

4. How each item of the research brief was answered

Brief item	What was done and found
1. Executed lease and transaction data (highest priority)	About 45 targeted searches across press, broker "leased" pages, Traded, business-for-sale sites, court and SEC sources. No executed Amagansett commercial rent is public for 2014–2026 ; this is stated explicitly in the memorandum. Executed items found: the subject's 2017 key-money assignment (rent undisclosed); 2095 Montauk Hwy 2025 closed lease; GreyVen at 53 The Circle, East Hampton, May 2024 at \$145/SF NNN (consistent with the building's 6% cap-rate sale offering); Warby Parker 48 Main St and David Lewis 53 The Circle 2022 (grade D snippets); Sea Dragon Books 2026 two-year lease (rent undisclosed); 177 Main St sales 2020 and 2023 with an implied-yield illustration labelled as not a rent comparable.
2. Direct comparables (10–15, tiered)	23 de-duplicated comparables across Tier 1 (Amagansett restaurant), Tier 2 (other Amagansett commercial) and Tier 3 (East Hampton Village, Montauk, Wainscott, Sag Harbor, Southampton, Westhampton, Hampton Bays). Only five Amagansett lease offerings could be confirmed current; three are floors of one building. Trophy retail is tabulated but flagged and excluded from the conclusion.
3. Historical listings	Dated time series 2012–2026: Gone Local's \$5,000/month ceiling on Main Street in 2013; Amagansett Square turnover 2015–2022; 249 Main St 2021 seasonal pop-up at "50K"; 74A history through Coche Comedor's September 2025 closure; 519–521 Montauk Hwy from a 2013 abandoned 7-Eleven lease to a \$7.95M sale listing; 11 Indian Wells and 136 Main sales; East Hampton Village asking trend 2007–2026 (about \$250/SF, \$175–200, \$110–140, \$125, \$250, \$150–245). Wayback Machine and LoopNet/Crexsi archives were blocked, so no archived listing captures exist.
4. Seasonal vs year-round	74A's 2026 seasonal ask (\$175,000 for May 22 to September 15) equals 73% of its annual base rent, matching the 2017 broker rule that seasonal rent runs two-thirds to three-quarters of annual. Seasonal quotes are converted to annual-equivalent by dividing by 0.67–0.75, not by scaling up by months; the month-scaled \$193/SF figure in the notes was rejected as misleading. No documented winter concession for year-round tenants was found.
5. Lease structure	NNN is the quoting norm: about 16 readable Hamptons storefront and restaurant listings say "+ NNN" and none says gross. Taxes run \$1.38–\$3.22/SF on small village buildings; the subject's taxes are about \$2.96/SF; 2095 Montauk's stated all-in NNN is \$8.94/SF. A \$7.00/SF NNN load (range \$5.00–\$8.75) is used to convert between NNN and gross-equivalent. Key money of \$250,000–\$700,000 is the usual mechanism for restaurant space;

Brief item	What was done and found
	no Hamptons source documents percentage rent, TI allowances or a standard escalation.
6. Property-specific adjustments	Seven-comparable grid covering location, foot traffic, size (0.15 elasticity), parking, patio, kitchen, condition, signage and zoning, storage, lease structure, seasonality and key money. Adjusted indicators run \$47.59 to \$83.25/SF.
7. Market rent calculation (three methods)	Method A direct: \$61–\$76/SF (score-3 comparables), central \$69. Method B weighted: \$66.24/SF with weights = tier × evidence grade × comparability score, fixed before calculation; robustness \$62.60–\$68.40. Method C distribution: 25th percentile \$55.41, median \$62.36, 75th percentile \$72.68. Reconciled: \$60 / \$66 / \$72 per SF NNN.
8. The specific question	BELOW MARKET. \$60–\$72/SF implies \$5,500–\$6,600/month; \$5,000 is about 17% below the \$6,050 midpoint.
9. Negotiation analysis	Conservative \$5,500 (+10%), fair midpoint \$6,050 (+21%), aggressive \$7,000 (+40%); five-year midpoint gap about \$63,000; structural alternatives (temporary deferral, reset at renewal, percentage rent, term extension, NNN conversion).
10. Tenant arguments	All ten anticipated arguments reviewed against dated evidence and classified as market-rent or tenant-economics factors, with responses. See section 7 below.
11. Source quality	131 sources graded A–D. No D-grade source supports any weighted figure. Grades are shown on every comparable row.
12. Excel workbook	Delivered: eight tabs (the seven specified plus Sources), 602 live formulas, zero recalculation errors, driven by three master inputs (SF, current rent, NNN load).
13. Landlord memorandum	Delivered as Word and PDF; reproduced unabridged as Part II of this edition.
14. Source documentation	Every comparable carries address, date, rent, SF, lease structure, URL, source and access date. 158 page captures are saved alongside the research notes.
15. Research rules	Addresses, property names and former tenant names searched individually; syndicated listings collapsed; asking and executed labelled on every line; seasonal and NNN normalised; sale prices used only for labelled implied-yield illustrations; "Unknown" written wherever a fact could not be verified.

5. Verified subject facts

Address and parcel	207 Main Street, Amagansett, NY 11930; SCTM 300-171-1-18; north side of Main Street between 203 Main (Amagansett Wine & Spirits) and the Town municipal lot at 209 Main. (Not the 207 Main Street in East Hampton Village, which is the Maidstone inn.)
Owner of record (A)	Amagansett Associates, 146 Oxford Blvd, Garden City, NY 11530 (also owns 203 Main). No recorded sale shown.
Assessment and taxes (A / D)	Property class 483 "Converted Residence"; assessed \$1,100 land / \$3,925 total, unchanged 2021–2025. 2025-26 taxes about \$3,261 (about \$2.96/SF; about 5.4% of current rent).
Lot (D)	0.05 acre, about 2,178 SF; below the CB 3,000 SF minimum; at or near the 50% coverage cap, so no room to expand.
Building (B / C, unverified)	One story, about 1,100 SF, retail and kitchen areas, exterior storage, customer patio. The 1,100 SF figure traces to the 2016 Douglas Elliman listing and the Mary's Marvelous founder's memoir; no

	government record confirms it. Kitchen "not much bigger than a bathroom"; repair problems recorded 2002–2017; cosmetic refresh 2020. Year built, basement, HVAC, frontage, seats and certificate of occupancy: Unknown.
Zoning (A, use table)	Central Business (CB) highly probable but not confirmed on a zoning map. Restaurant and take-out food store permitted as of right in CB per the 2018 Town use table. The 2016 listing described the premises as one of a "finite number of permitted wet uses".
Historic status (A)	Town Code ch. 255, Appendix A § A-5(C)(1): one of nine historic commercial buildings in the Amagansett Central Business District ("First Great Atlantic and Pacific Tea Company (The Coach Factory Store)"). Alterations, signage, lighting and awnings go to the Architectural Review Board.
Parking	No on-site parking documented. Adjoins the Town lot at 209 Main (planned 2020 at about 185 spaces); more public parking planned on the Field property.
Occupancy	Mary's Marvelous 2002–June 2017 on a "handshake" lease, left to consolidate in East Hampton. Organic Krush since late June 2017; seasonal winter closures since at least 2019–20; October 2026 hours Friday to Monday 8am–5pm. The chain lists five stores, down from about ten in 2020; no bankruptcy or ownership change found.
Lease	Type (gross, modified gross or NNN), term, escalations, options, repair allocation and whether today's lease is the one assigned in 2017: all Unknown. Only public description: "long-term lease".
Current rent	\$5,000/month; \$60,000/year; \$54.55/SF at 1,100 SF; \$60.00/SF at 1,000 SF; \$50.00/SF at 1,200 SF.

6. Negotiating positions

Position	Basis	\$/SF/yr NNN	Monthly	Annual	Over \$5,000
Conservative floor	Low end of reconciled range; just below the lowest score-3 comparable (\$61.36)	\$60.00	\$5,500	\$66,000	+10%
Fair market midpoint	Method B weighted result (\$66.24), rounded	\$66.00	\$6,050	\$72,600	+21%
Aggressive opening	74A Montauk Hwy adjusted indicator (\$76.33), the only Tier 1 food-service comparable	\$76.36	\$7,000	\$84,000	+40%

How far below market the current rent is. At 1,100 SF on a NNN basis, \$5,000 is \$500/month (\$6,000/year) below the conservative floor, \$1,050/month (\$12,600/year) below the midpoint and \$2,000/month (\$24,000/year) below the aggressive position. Over a five-year term the midpoint gap is about \$63,000 before escalations.

Recommended stance on a reduction request. The evidence identifies no adverse change in market-rent factors that would support a permanent reduction below \$5,000, which is already below the reconciled range. If the tenant documents hardship, offer a defined, repayable deferral (for

example one off-season) conditioned on store-level sales and profit-and-loss statements, and preserve the base rent. Use any re-opening of terms to set a path to \$5,500–\$6,600 with annual increases, and consider trading term, guaranty and operating covenants for a stepped increase. If the lease is gross, a conversion to NNN adds about \$5–\$8.75/SF of value without changing headline rent.

7. Tenant arguments reviewed

Market rent is "the most probable rent that a property should bring in a competitive and open market" between typically motivated parties (Appraisal Institute). It reflects what a typical tenant would pay for the premises, not whether the incumbent's business is profitable; "use rent" tied to one operator "is never synonymous with market rent."

#	Argument	Evidence	Type	Response
1	Business is struggling	Chain contracted from about 10 stores (2020) to 5; Virginia units closed 2023–24; no bankruptcy found	Tenant economics	Same space drew several serious inquiries and \$575–625K key-money asks in 2016–17. Ask for financials before any temporary, repayable relief.
2	Revenue is seasonal	Store closes December–March since at least 2019; Fri–Mon hours in fall 2026	Market (priced in); schedule is tenant choice	Seasonality was known when the leasehold was bought and is embedded in every comparable.
3	Construction disrupted us	2026 brick-sidewalk work was on the south side, Hedges Lane to Amagansett Square, targeted May 1–15; subject appears to be on the north side	Temporary at most; finished work is a market positive	Ask for dated evidence of obstruction at the frontage; any accommodation is a one-time credit, not a base-rent cut.
4	Labor and food costs	Long Island minimum wage \$17.00 in 2026, frozen for 2027; tipped \$11.35 plus \$5.65 credit	Industry-wide tenant economics	Every competing operator bears these costs; new entrants chose Amagansett despite them.
5	Foot traffic is down	Town Board cites "increasing foot traffic" (March 2026); west-end "business boom" (July 2026); Suffolk sales tax +9.2% H1 2026; no pedestrian counts	Market, but local evidence runs the other way	Ask for the tenant's transaction counts; a decline that coincides with Fri–Mon hours points to operator factors.
6	Building condition	Repair history 2002–2017; refresh 2020; current condition Unknown	Market factor if below comparables and a landlord obligation	Partly valid and already priced (~5%). Inspect, check repair allocation, fix landlord items directly.
7	Space is small	1,100 SF plus patio	Market attribute, handled per SF	Small spaces command higher rent per SF; size was fixed and known at purchase.
8	Parking is limited	No on-site spaces; adjoining Town lot planned at about 185 spaces; more planned	Market attribute	Partly valid and already priced (~10%). Take-out café is among the least parking-dependent uses.
9	More competition	Doubles 2022, Rowdy Hall 2023, Sett Coffee, Jamagansett and Amagansett Coffee Co. 2026	Mainly tenant economics; entry signals demand	New capital entering the hamlet shows operators value Amagansett food locations.
10	Economy is weak	Suffolk sales tax +9.2%; Hamptons	Market; current	The affluent seasonal customer base is strong

#	Argument	Evidence	Type	Response
		median home price +18% Q1 2026; record \$39M retail sale May 2026; national restaurant traffic weak in 2025	evidence supports holding rent	by every primary indicator found.

Market factors that genuinely justify a discount, and how they were treated. Five subject attributes are real market discounts and are the reason the midpoint (\$66) sits about 22% below the 74A ask (\$84.81): no on-site parking (–10%), a very small kitchen (–10%), condition history (–5%), a smaller patio than the comparable (–5%) and limited storage (–5%). The undersized nonconforming lot and the historic-district review burden are noted but not separately charged. None of the ten arguments points to a lasting decline in market rent.

8. Research process and source quality

Six parallel evidence streams were run on October 7, 2026: subject-property verification; executed transactions; current Amagansett listings; historical listings 2012–2026; Tier 3 comparables and lease structure; and market conditions and tenant arguments. Together they ran several hundred searches and page fetches and saved 158 page captures, each headed with its URL and access date. The memorandum in Part II cites 131 sources, each graded:

- **A (excellent):** government records (NYS assessment roll, Town Code, NYS Department of Labor, Office of the State Comptroller, 12 CFR 323.2) and the subject's recorded ownership.
- **B (good):** current broker listings with full terms (Hamptons Commercial Real Estate / Compass, Saunders, Corcoran), established publications (The Real Deal, WWD, 27east, East Hampton Star) and the Appraisal Institute definition.
- **C (supporting):** historical listings, local press from 2013–2017, business websites and the Mary's Marvelous founder's memoir.
- **D (weak):** search snippets from LoopNet, Crexi, CityFeet, Traded and PropertyShark, which blocked direct access. No D-grade source supports any weighted figure.

9. Limitations

- **Blocked databases.** LoopNet, Crexi, CityFeet, Showcase, Realmo, CommercialCafe, PropertyShark, Traded, BizBuySell, BizQuest, ecode360, Town of East Hampton PDFs, NY Courts, Yelp, Toast and BLS pages refused automated access. The Wayback Machine's index search was blocked and it held no snapshot of the 2016 Elliman listing. No CoStar, CompStak or Reonomy data was available.
- **No executed Amagansett rents.** The conclusion relies on adjusted asking rents with an assumed 5–10% ask-to-achieved discount, plus inference from key money.
- **Subject data gaps.** 1,100 SF unverified; lease type, term, escalations, options, repair allocation and guaranty Unknown; whether today's lease is the 2017 assigned lease Unknown; HVAC, basement, frontage, seats, certificate of occupancy, year built and current condition Unknown; CB zoning inferred.
- **Conflicting figures flagged.** Behind the Hedges printed "270 Main Street"; key money reported as \$625,000 (27east) and \$575,000 (Behind the Hedges); 7 Hill St shows \$71.35 and \$90.81/SF; 2095 Montauk is flagged "Unverified" and its page header shows "/mo" against "/yr" in the text; the broker appears as both Robert and Richard Kohr; 249 Main's "50K" has no stated basis.

- **Judgment assumptions.** The \$7.00/SF NNN load, 0.15 size elasticity, 50% non-equipment share of key money, 10-year key-money amortization, 0.71 seasonal factor, 5–10% ask discount and the comparable weights are appraiser judgments, stated so a reviewer can substitute alternatives. Reasonable alternatives move the weighted result between about \$62.60 and \$68.40.

10. Recommended next steps, in order of value

1. Pull the **landlord's own lease file**: lease type, expense allocation, term, escalations, renewal or reset clauses, and whether the current lease is the 2017 assigned lease.
2. Obtain the **Town assessor property record card and certificate of occupancy** for 300-171-1-18 and confirm CB zoning on the Town zoning map.
3. **Measure the premises** (gross and usable SF, patio and storage separately). At a measured 1,000 SF on a NNN lease the current rent sits at the low edge of market; at 1,100 SF or more, or on a gross lease, it is clearly below.
4. Search the **Suffolk County Clerk** for any recorded memorandum of lease for 207 Main Street and for Amagansett restaurant leases.
5. Ask **Douglas Elliman** (Robert Kohr, Lori MacGarva) for the 2017 transaction file, and ask Hamptons Commercial Real Estate for the rents behind its "Napeague Stretch Wet Use" and "East Hampton Wet Use" closed deals.
6. Purchase a **CoStar or CompStak** lease-comparable pull for South Fork food-service space, 2022–2026.
7. Commission a **site inspection** of condition, kitchen infrastructure (hood, grease trap, septic), HVAC and frontage, and confirm which side of Main Street the 2026 sidewalk work affected.

Market Rent Conclusion

Landlord decision page. Figures are ESTIMATES from the reconciled comparable analysis; NNN base rent at 1,100 SF unless stated.

MARKET RENT CONCLUSION	
Estimated market rent	\$60–\$72/SF/year (NNN base rent)
Estimated monthly market rent	\$5,500–\$6,600/month
Best-supported midpoint	\$6,050/month
Current rent	\$5,000/month
Current discount/premium to market	17% discount (about 17% below the \$6,050 midpoint; about 9% below the low end)
Recommended landlord negotiating position	\$6,050/month (reset target at renewal; no permanent reduction below \$5,000 in the interim)
Minimum market-supported position	\$5,500/month
Confidence level	Low (no executed Amagansett rent is public, and the 1,100 SF area and the lease type are unverified; the direction of the finding is better supported than its size)

Would an independent commercial real estate broker or appraiser likely view \$5,000/month as below-market, assuming the verified property characteristics? Yes, most likely as **modestly below market**, though not dramatically so. An independent reviewer would weigh the Tier 1 restaurant ask of \$84.81/SF NNN with \$700,000 key money, the \$65/SF NNN ask for dry Main Street district space, and the documented key-money premium paid for this exact leasehold in 2017. Against these, the reviewer would set the low closed Napeague lease and the subject's small kitchen, repair history and lack of on-site parking; on balance, that supports a market rent near \$60–\$72/SF against the current \$54.55/SF. The reviewer would condition that opinion on confirming the floor area and the lease type: at a measured 1,000 SF on a NNN lease the current rent would sit at the low edge of market, while at 1,100 SF or more, or on a gross lease, it would be clearly below market.

Part II follows: the complete Commercial Market Rent Assessment memorandum, unabridged.

MEMORANDUM

207 Main Street, Amagansett

Commercial Market Rent Assessment

Landlord Market Rent Opinion | Prepared October 7, 2026

Subject: 207 Main Street, Amagansett, NY 11930 (SCTM 300-171-1-18)

Confidential. Not an appraisal. Prepared for the landlord's negotiation use. Market rent figures are ESTIMATES based on adjusted asking rents: no executed Amagansett commercial rent is public for 2014–2026, and the 1,100 SF area, lease type and expense responsibilities are unverified. The assumptions that drive the result are appraiser judgments, stated so that a reviewer can substitute alternatives.

Market Rent Conclusion.....35

Basis of assessment and evidence conventions

Effective date: October 7, 2026. **Subject:** 207 Main Street, Amagansett, NY 11930 (SCTM 300-171-1-18), Town of East Hampton, Suffolk County. **Rent basis:** annual base rent per square foot (SF), triple-net (NNN), unless a figure is labelled otherwise. **Area basis:** 1,100 SF, broker-reported and unverified by any government record (see Subject Property).

Evidence labels used throughout: **ASK** = asking rent on a listing; **EXECUTED/CLOSED** = a signed, assigned or broker-reported closed lease; **HISTORICAL** = a dated past listing or event; **BROKER OPINION** = a broker's quoted range or rule of thumb; **ESTIMATE** = a figure inferred or calculated in this report. Source grades: **A** = government record or recorded transaction; **B** = broker listing with detailed terms or established real estate publication; **C** = historical listing, local newspaper or business website; **D** = aggregator, unverified database or search snippet. Bracketed numbers refer to the Sources / URLs list.

Executive Summary

Key figures	
Current rent	\$5,000/month (\$60,000/year; \$54.55/SF/year at 1,100 SF)
Finding	BELOW fair market rent , by a moderate rather than a dramatic margin
Reconciled market rent (ESTIMATE)	\$60–\$72/SF/year NNN
Implied monthly market rent	\$5,500–\$6,600/month for 1,100 SF
Best-supported midpoint	\$66/SF, or \$6,050/month
Current rent vs. market	About 17% below the market midpoint and about 9% below the low end of the range; about 25% on a gross-equivalent basis if the lease is gross
Negotiating positions	Conservative \$5,500 Midpoint \$6,050 Aggressive \$7,000 per month
Confidence	Low on the precise dollar range; higher on the direction of the finding

Answer: the current rent of \$5,000/month (\$60,000/year; \$54.55/SF/year at 1,100 SF) is BELOW fair market rent, by a moderate rather than a dramatic margin. The reconciled ESTIMATE of market rent is **\$60–\$72/SF/year NNN**, which implies **\$5,500–\$6,600/month** for 1,100 SF, with a best-supported midpoint of **\$66/SF, or \$6,050/month**. On that basis the existing rent is **about 17% below the market midpoint and about 9% below the low end of the range**. If the lease turns out to be gross (landlord pays taxes, insurance and building costs), the gap widens to about 25% on a gross-equivalent basis. These are calculations from the adjusted comparables in this report, not executed Amagansett rents, because no executed Amagansett commercial rent has been publicly disclosed for 2014–2026.

The **strongest defensible evidence** for the landlord is, in order: (1) this exact leasehold was marketed in December 2016 for **\$625,000 in key money** for the "long-term lease" and equipment, later quoted at **\$575,000**, and was assigned to Organic Krush on **June 12, 2017** after drawing "several serious inquiries" within a day [10][13][15], which shows that informed market participants valued occupancy of these premises above the contract rent then in force; (2) the only current Amagansett restaurant offering, 74A Montauk Highway, ASKS **\$240,000/year NNN (\$84.81/SF) plus \$700,000 key money** [28][30]; (3) dry, non-food space in the Main Street district at 11 Indian Wells Highway ASKS **\$65/SF NNN** [33]; (4) the local market is tight, with an Amagansett Square restaurant renewal offered at "almost triple" the prior rent in 2021 [76], few village vacancies since COVID [100], landlords "able to choose what tenants they want" [101] and Suffolk County sales tax up **9.2%** in the first half of 2026 [103]; and (5) restaurant and take-out food use are permitted as of right in the Central Business (CB) district under the 2018 use table [5], while the space was described as one of "a finite number of permitted 'wet uses'" in the Town [10].

The evidence is **thinner than an asking-rent reading would suggest**, and this report does not overstate it. The **only closed Amagansett food-service lease** in the record, 2095 Montauk Highway on the Napeague stretch, rented in June 2025 at **\$180,000 base plus \$40,000 NNN, about \$40.21/SF base**, for a 4,476 SF off-core white box with an apartment, and Compass flags the closed price as "Unverified" [42]. The two Amagansett asks that bracket the market have sat **194 to 547 days without a price cut** [28][33][34]. The subject also has genuine physical limitations that the market would price: a kitchen "not much bigger than a bathroom," a wood building that "had problems," no on-site parking and an undersized lot [18][6]. After adjusting for these factors, the comparables support a market rent well below the raw \$65–\$85/SF

Amagansett asks. Trophy retail (East Hampton Village at \$145–\$154/SF NNN, 136 Main Street Unit 1 at \$192/SF, Sag Harbor small units at \$161–\$240/SF) is excluded from the conclusion except as an outer ceiling.

Negotiating implication: the evidence identifies no market-rent factor that would justify a **permanent** reduction below \$5,000/month. The conservative, midpoint and aggressive market positions are **\$5,500, \$6,050 and \$7,000/month** respectively. Any relief the landlord chooses to grant is better framed as temporary, documented tenant-economics relief (deferral with payback, tied to financial disclosure) than as a market reset. **Confidence is Low** on the precise dollar range and higher on the direction of the finding.

Subject Property

The subject is a one-story, wood-frame historic storefront on the north side of Main Street (NY-27) in the Amagansett commercial core. It sits between Amagansett Wine & Spirits at 203 Main Street (same owner) and the Town-owned municipal parking lot at 209 Main Street [2]. Each client-specified item is addressed below; "Unknown" means no source in the record establishes the fact.

Item	Finding	Label / grade
Parcel ID	SCTM 300-171-1-18 (print key 171.-1-18), SWIS 472489, Amagansett school district [1][7]	Government record, A
Owner of record	"Amagansett Associates," 146 Oxford Blvd, Garden City, NY 11530, every roll year 2021–2025; the same entity owns 203 Main Street [1][2]	A
Property class	483, "Converted Residence" (not 421 Restaurant) [1]	A
Assessed value	\$1,100 land / \$3,925 total, unchanged 2021–2025 [1]; PropertyShark's equalized "market value" is \$1,226,562 for 2025-26, a statistical figure, not an appraisal [3]	A (AV); D (equalized value)
Real estate taxes	About \$3,261 for 2025-26 (rate 830.88), up from \$2,511 in 2016-17 [3]; about \$2.96/SF at 1,100 SF (ESTIMATE)	D; Town tax bill not obtained
Lot size	0.05 acre, about 2,178 SF [3][11]; because the acreage is rounded, the true lot could be roughly 1,960–2,370 SF (ESTIMATE). Below the CB minimum lot area of 3,000 SF [6]	D / C; zoning A
Building SF	About 1,100 SF, one story [9][10][18]. Every source traces to the 2016 Douglas Elliman listing (quoted verbatim by Patch: "The one story building is 1100 sf") [9] and the former operator's memoir ("tiny 1,100-square-foot building") [18]. No government record confirms it: the NYS roll has no building-area field and records frontage and depth as 0 [1]; PropertyShark shows building size "not shown" [3]. Consistency check: the CB district caps building coverage at 50% [6]; 50% of 2,178 SF is about 1,089 SF, so a 1,100 SF footprint is at or near the cap and a materially larger one-story building is unlikely unless pre-existing and nonconforming (ESTIMATE)	B (listing), C (memoir); unverified
Rentable / usable SF	Unknown. No gross, rentable or usable figure is separately stated anywhere	Unknown
Main Street frontage	Unknown in feet (roll records 0) [1]. Described as a "corner storefront" with "two large pane-glass windows" [18]	C
Parking	No on-site parking documented. The adjoining parcel at 209 Main is Town-owned, class 653 "Parking Lots" [2]. A 2020 Town plan called for reconfiguring the lot to about 185 spaces with 30-minute, 2-hour and 24-hour limits [25]; completion not verified in an A–C source. More public parking is planned on the adjoining Field property [114]	A (adjacency); C (capacity)
Patio / outdoor seating	Yes: "Outdoors feature patio space for customers to enjoy" [9]. Patio area and approved seat count: Unknown	B

Item	Finding	Label / grade
Kitchen	Yes: "Interior space is retail and kitchen" [9]; the former operator called it "a kitchen not much bigger than a bathroom" [18]; Organic Krush added "new kitchen efficiencies" in 2020 [20]. Hood, grease trap and sanitary-flow capacity: Unknown . Equipment ownership today: Unknown (the 2017 assignment conveyed "existing equipment" to the assignee [9])	B / C
HVAC	Unknown	Unknown
Basement / storage	Basement: Unknown (no source mentions one). Storage: "additional exterior storage space" [9]	B
Zoning	Central Business (CB), highly probable but not confirmed on a zoning map. The Town lists 207 among "the nine historic commercial buildings in the Central Business District" [4], and the adjoining 177 Main Street is confirmed "CB: Central Business" [7]	A (by inference)
Permitted restaurant use	Town Code § 255-11-10 use table (version dated 09-01-2018): Restaurant = P; Take-out food store = P; Retail store = P; Fast-food restaurant or drive-in = SP in CB [5]. The 2026 text was not verified. The space was marketed as "one of a finite number of permitted 'wet uses' in East Hampton Town" [10]	A (2018 table); B (wet-use statement)
Historic status	Town Code ch. 255, Appendix A, § A-5(C)(1) lists "207 Main Street, First Great Atlantic and Pacific Tea Company (The Coach Factory Store)" as one of nine historic commercial buildings; original storefronts, materials and details "should be retained," and alterations go to the Architectural Review Board (ARB) [4][7]. Year built: Unknown ; pre-1950 construction is implied because the guidelines treat post-1950 buildings as nonhistoric [4]	A
Visibility / signage	Main Street core frontage next to the Town lot and the library [2]; the hamlet's commercial development "has been concentrated on the north side of Main Street in the vicinity of the town parking lot" [4]. "Internally illuminated signs are not appropriate"; signage and paint go to the ARB [4][7]	A
Condition	Former operator (2002–2017): "The building had problems. Real ones." "We were always repairing something" [18]; cosmetic refresh in 2020 [20]. Current condition: Unknown	C
NNN vs gross	Unknown	Unknown
Who pays taxes / CAM / insurance / utilities	Unknown for each	Unknown
Existing lease	\$5,000/month (client-provided). Commencement, expiry, options, escalations, repair allocation and guaranty: Unknown . Public record shows only a "long-term lease" assigned in 2017 [15]	Client; B
Current operation	Organic Krush, which opened in June 2017 intending to trade seven days a week, year-round [19]; posted hours now Friday–Monday 8am–5pm, closed Tuesday–Thursday [22][23]; seasonal winter closures in 2019, 2023 and 2025 [121][24][122]; chain now lists five stores [21]	C / D

Area caveat. All \$/SF figures for the subject are carried at **1,100 SF**. Because that figure rests on a 2016 broker listing and a memoir rather than a measurement, the Sensitivity Analysis restates the subject's rent at 1,000 SF and 1,200 SF. The 50% coverage cap on a roughly 2,178 SF lot makes a materially larger footprint unlikely, but a smaller measured area (for example, if 1,100 SF includes exterior storage) is plausible.

Current Lease Economics

Metric	Value	Basis
Monthly rent	\$5,000	Client-provided
Annual rent	\$60,000	Calculation
Rent per SF per year	\$54.55 at 1,100 SF (\$60.00 at 1,000 SF; \$50.00 at 1,200 SF)	ESTIMATE (area unverified)
Lease type	Unknown (gross, modified gross or NNN)	Unknown
Real estate taxes as % of rent	About \$3,261 / \$60,000 = 5.4% ; about \$2.96/SF [3]	ESTIMATE from D-grade tax figure
If gross, net-equivalent rent	\$54.55 less an assumed \$7.00/SF NNN load = about \$47.55/SF	ESTIMATE (NNN load derived in Comparable Adjustments)

The 2016–2017 lease assignment. In December 2016 the Mary's Marvelous leasehold at 207 Main Street was publicly marketed by Douglas Elliman (Robert Kohr and Lori MacGarva). The listing text read: "This sale is 'key money' for the well established business, long term lease, and existing equipment; It does not include the business name or property" [9]. The asking key money was **\$625,000** [9][10][12]. Broker Kohr said "There's only so many wet use stores out there" and that the deal "is essentially the same as buying a business, not a property" [12]. By June 2017 Behind the Hedges reported that "the lease, listed for \$575K, has sold" [13][14], while 27east, on the same day, cited only the original \$625,000 [15]. Organic Krush's co-founder said "the deal for purchasing the space was closed on Monday, June 12, for a price that she did not wish to discuss" [15]. The **closing price, contract rent, remaining term and lease type were never published**. Patch and Hamptons.com headlines describing "the property" as "sold" [16][17] mischaracterize what was a leasehold assignment; no fee transfer is recorded [3].

What the key money implies (inference, with explicit assumptions). A buyer pays key money to step into an existing lease only if the rent is below what a new lease would cost, or if the use entitlement, equipment and going-concern value are scarce. The executed-transactions research capitalized the asking key money at an assumed 10% discount rate over assumed remaining terms; the arithmetic is reproduced here as an ESTIMATE, not a finding:

Key money (ask)	10-year remaining term	15-year	20-year
\$575,000 [13]	\$93,579/yr (\$7,798/mo)	\$75,597/yr (\$6,300/mo)	\$67,539/yr (\$5,628/mo)
\$625,000 [10]	\$101,716/yr (\$8,476/mo)	\$82,171/yr (\$6,848/mo)	\$73,412/yr (\$6,118/mo)

These figures are a **loose upper bound** on the 2017 gap between contract rent and market rent. Part of the payment bought used equipment, part bought the business's goodwill, and part bought the scarce wet-use status. Taken literally they would imply a 2017 market rent far above any current comparable, which itself shows that the key money was not a pure rent differential. The defensible conclusion is directional: **in 2016–2017 informed buyers valued this leasehold above its contract rent**. The illustration is not used in the market-rent calculation.

Is today's \$5,000 the same lease? Unconfirmed. No source states whether the current \$5,000/month derives from the lease assigned in 2017 (possibly with escalations), from a renewal, or from a new lease. If it is the assigned legacy lease, the 2017 key money is direct evidence that it was a below-market rent stream when assigned. If it is a newer lease, the key-money evidence speaks only to 2017 conditions. The landlord's own lease file resolves this, and it should be checked before the evidence is used in negotiation.

Amagansett Market Overview

Supply is extremely thin. As of October 7, 2026, only **five verifiable current lease offerings** exist in Amagansett 11930, and three are floors of one building (11 Indian Wells Highway) [33][34][35][48]. The others are the 74A Montauk Highway restaurant [28] and 519–521 Montauk Highway, which quotes "rate upon request" and whose current status could not be verified [44][46]. The broker of record for most Amagansett offerings lists no other Amagansett lease in its 79-property sitemap [48]. The 500 SF end-cap at 136 Main Street (last ASK \$96,000/year NNN, \$192/SF) appears withdrawn or leased: its broker page returned 404 and it is absent from the broker's active list [39][40]. An automated LoopNet figure of "about \$103 per square foot" for Amagansett retail is an aggregate of these few listings, not a comparable [49].

Asking-rent tiers. Current Amagansett ASKS run from **\$35/SF NNN** (rear-access lower level) through **\$50** (second floor) and **\$65** (first-floor Main Street district flex) at 11 Indian Wells Highway [33][34][35] to **\$84.81/SF NNN plus \$700,000 key money** for a 2,830 SF, 126-seat turnkey restaurant with 31 parking spaces at 74A Montauk Highway [28]. The only CLOSED food-service lease, 2095 Montauk Highway on the Napeague stretch, works out to **\$40.21/SF base plus \$8.94/SF stated NNN** [42]. None of these is a close physical match for a 1,100 SF Main Street café; no current Main Street listing between 800 and 1,500 SF with a kitchen exists.

Absorption signals cut both ways. 74A has been offered for about 194 days and 11 Indian Wells Highway for about 316 days (first floor) to 547 days (ground level), all without a visible price cut [28][29][33][34]; a Crexi snippet suggests the first floor has been marketed even longer [37]. That points to asks at or above clearing levels for those configurations. On the other side, the Amagansett food-space record shows quick re-tenanting after exits: Hampton Chutney left Amagansett Square in 2021 after a rent offer "almost triple" its old rent, and Doubles opened in the space in July 2022 [76][24]; Main Street Tavern closed in 2022 and Rowdy Hall relocated to 177 Main Street in 2023 [24][83]; and the 136 Main Street frontage filled in 2026 with Sett Coffee, Sea Dragon Books (on a two-year lease), Jamagansett and LaParlour [86].

Demand indicators are positive. The East Hampton Star reported in July 2026 that Amagansett's west end, "once dead as a desert," had "come to life this summer" [86]. Town Board members in March 2026 cited "increasing foot traffic" and said "Amagansett is happening right now" [104][105]. New food and beverage entrants include Amagansett Coffee Co. (April 2026) [115] and the Meeting House reopening in Amagansett Square [119]. Region-wide, a Saunders broker said in 2026 that "Since then [COVID], the villages, particularly East Hampton and Sag Harbor, haven't had many" vacancies [100]; The Real Deal reported in 2025 that "landlords are able to choose what tenants they want because there's limited supply" [101]; and Hamptons median sale prices rose 18% in Q1 2026, with a record \$39 million retail sale in May 2026 [102]. Suffolk County sales-tax receipts rose **9.2%** in the first half of 2026, although the State Comptroller attributes part of that to higher prices and warns it "may not last" [103].

Headwinds are real but mostly operator- and industry-level. Coche Comedor closed at 74A on September 27, 2025, with its operator saying "running a seasonal business, especially a restaurant in the Hamptons, has grown increasingly difficult" [78]. Nationally, more than 60% of restaurant operators reported traffic declines in 2025 [108]. The Long Island minimum wage rose to \$17.00 in 2026 [106][107], but it will **not** rise in 2027 because the statutory off-ramp was triggered [106]. Seasonality is structural: in February 2023 Organic Krush was "Closed for the winter," and an Amagansett operator described winter closure as "a really big no-brainer" given fixed costs [24].

Regulatory supply constraint. The CB district and historic district restrict new commercial space; in 2022 the Planning Board found a 12-storefront proposal at 136 Main Street out of scale [123], and the Town's hamlet study recommends retaining the present CB configuration [8][124]. Restricted supply of permitted food-service premises supports market rent for existing wet-use space such as the subject [10].

Comparable Properties

De-duplication and conventions. Syndicated copies of the same listing (HCRE, Compass, Saunders, LoopNet, Crexi, CityFeet, Realmo) are collapsed into one row. Each row is labelled ASK, CLOSED, EXECUTED or HISTORICAL. "\$/SF/yr" is annual base rent divided by stated SF (calculation). "Effective \$/SF (gross-equivalent)" adds the stated NNN where a listing gives it, and otherwise an assumed **\$7.00/SF** NNN load (derived in Comparable Adjustments). The client's required minimum set alone yields 19 de-duplicated rows; four supporting Southampton, Sag Harbor and Hampton Bays rows bring the table to 23. **Tier 1** = Amagansett Main Street/Montauk Highway food service of about 500–3,000 SF; **Tier 2** = other Amagansett commercial; **Tier 3** = other Hamptons hamlets. Comparability is scored 1 (weak) to 5 (near-identical).

Table A. Comparable properties: location, size and rent

#	Property	Address	Hamlet	Type	SF	Lease type	Annual base rent	Monthly	\$/SF/yr	Effective \$/SF (gross-equiv.)
1	Former Coche Comedor (annual option)	74A Montauk Hwy	Amagansett	Turnkey restaurant, 126 seats	2,830 main level + finished lower level	NNN	\$240,000 (ASK)	\$20,000	\$84.81	\$91.81

Reading the table. Three clusters emerge. **Restaurant and food boxes** (rows 1, 8, 11, 18, 23) ask or closed at about **\$30–\$85/SF base**, usually with key money of \$250,000–\$700,000 attached. **Off-core and upper-level Amagansett space** (rows 4, 5) asks \$35–\$50. **Trophy and small-unit village retail** (rows 6, 12–14, 16, 17, 19, 20) runs **\$145–\$240/SF**. The trophy cluster reflects national-brand marketing locations and very small units; a 2019 report noted that brands there are "less concerned with running profitable East End stores than having their brand associated with the Hamptons" [92]. **These trophy rows are not mixed into the restaurant conclusion.** They appear in the table because the client required them and because a tenant's broker may cite them; reaching a 1,100 SF Amagansett food-service equivalent would require downward adjustments of roughly 50–65%, which is too large to produce a reliable indicator. The analysis therefore relies on the seven comparables graded in the next sections.

Executed Transactions

No executed Amagansett commercial rent (dollars per month, per year or per SF) has been publicly disclosed for 2014–2026. That is the central limitation of this assessment, and it is stated without qualification.

What was searched. About 45 distinct web searches and about 30 page fetches covered: the local press archives (27east, East Hampton Star, Behind the Hedges, Dan's Papers, Patch, Hamptons.com, The Real Deal); broker closed-deal pages, including the HCRE "Closed Deals" page, which lists about 24 leased properties by label only (for example "Napeague Stretch Wet Use" and "East Hampton Wet Use"), with no addresses, dates or rents [118]; Traded.co deal records (no Amagansett records found); BizBuySell, BizQuest and other business-for-sale sites (blocked or no Amagansett results); court records, including a 2024 Appellate Division market-rent decision that could not be opened [128]; SEC filings; Suffolk County Clerk land records for a memorandum of lease (not publicly searchable online); and paid lease-comparable databases such as CoStar and CompStak (no access). Tenant-specific searches for Organic Krush, Mary's Marvelous, Rowdy Hall, Doubles, Il Buco al Mare, Astro's, Jack's Stir Brew and others returned no rent disclosures.

The executed or closed items that do exist are below. Each is labelled with what it is and is not.

Item	Date	What was executed	Rent disclosed?	Implication	Source / grade
207 Main St, Amagansett (subject)	Closed 2017-06-12	Assignment of the "long-term lease" and equipment from Mary's Marvelous to Organic Krush; key money ASK \$625,000, later \$575,000	No (price and rent undisclosed)	Market participants paid a premium to occupy this space; contract rent below market at the time (inference)	[10][13][15]; B, broker-confirmed completed transaction
2095 Montauk Hwy, Napeague	Closed 2025-06-08	New lease of a 4,476 SF white-box restaurant	Yes, broker-reported: \$180,000 base + \$40,000 NNN (\$40.21 + \$8.94/SF); Compass flags the price "Unverified"	The only closed Amagansett-ZIP food-service rent; low anchor	[42]; B
GreyVen, 53 The Circle, East Hampton Village	Closed 2024-05-09	Retail lease, 1,635 SF	\$145/SF NNN (\$237,075/yr) per Traded.co snippet; corroborated by 6% cap on a \$3,959,000 sale ask	Trophy-corridor ceiling; not a restaurant comparable	[53]; D
Warby Parker, 48 Main St, East Hampton Village	Signed 1/1/2022	Retail lease, 1,341 SF	\$125/SF (\$167,625/yr), labelled "asking rent" on Traded.co	Trophy ceiling; may be an ask	[55]; D
David Lewis Gallery, 53 The Circle	1/1/2022	Gallery lease, 1,645 SF	\$73/SF (\$120,085/yr), labelled "asking"	Village secondary data point	[54]; D

Item	Date	What was executed	Rent disclosed?	Implication	Source / grade
Hampton Chutney, Amagansett Square	Lease expired Oct 2020; offer spring 2021	Landlord's renewal offer (not accepted) at "almost triple what we're paying now"	No dollar figures	Qualitative executed-market event: an Amagansett landlord priced a 20-year legacy food tenant at about 3x; space re-let to Doubles by July 2022; Hampton Chutney moved to 107 Newtown Lane, East Hampton, the former Mary's Marvelous store [77]	[76][77][24]; C
177 Main St, Amagansett (Rowdy Hall)	Sales 2020 and 2023-01-17; lease 2023	Building bought for \$2.825M (2020), listed at \$4.995M in Oct 2022 and sold for \$4.45M (2023) to ROP Amagansett LLC to lease out; Rowdy Hall opened Nov 2023	Lease rent not disclosed	See implied-yield illustration below	[81][82][80][83]; B/C
Sea Dragon Books, 136 Main St	2026	Two-year lease	No	Confirms leasing activity on the Main Street frontage	[86]; C

177 Main Street implied-yield illustration (ESTIMATE only, not a rent). If an investor bought 177 Main Street for \$4.45 million [80] expecting a 5.5–6.5% yield (an assumed range, not sourced), the implied net income would be about **\$244,750–\$289,250 per year**. On the roughly 2,900 SF reported in press coverage, that is **\$84–\$100/SF**; on the 2,304 SF ground floor recorded in the Town's ARB file (which also notes a 650 SF lower level and 94 approved seats) [7], it is about \$106–\$126/SF. This is inferred from a sale price, not a lease. The buyer may have priced in land value or upside, and the price rose about 58% between 2020 and 2023 [81][80]. It is presented only to show that Amagansett restaurant real estate is priced by investors at levels consistent with, not below, the reconciled market range. It carries **no weight** in the calculation.

Concessions and asking-to-achieved spreads. In the 2009 downturn, East Hampton achieved rents were reported "20 or 25 percent" below unchanged asks [88]. The only granular 2026 concession data found (CompStak, Bay Area retail, not Hamptons) puts free rent at about 2.3% of term [112]. Long Island in-place retail rents are described as "routinely 15–25% below today's market" [113]. Appraisal practice is to "Model Net Effective Rent, not asking rent" [111], but no Hamptons-specific asking-to-executed spread exists in public sources; the adjustments below use a moderate 5–10% discount to asks.

Historical Market Evidence

The table is a dated time series of figures from 1997 to 2026, each labelled by type. **No archived listing captures exist.** The Wayback Machine's CDX search was blocked by the egress proxy and its availability endpoint returned no snapshot for the 2016 Elliman listing of the subject; LoopNet and Crexi listing pages returned HTTP 403. Some Town Code pages were readable only through archived copies, but no historical commercial listing could be retrieved that way. Historical asks therefore come from press coverage and broker pages that are still live.

Date	Location	Figure or event	Label	Source
1997-05	East Hampton Village	\$45–\$70/SF; spaces under 1,000 SF "proportionately more"	BROKER OPINION	[87]

Date	Location	Figure or event	Label	Source
2007–08	East Hampton Village prime	"up to \$250 a foot"	BROKER OPINION	[88]
2009-06	East Hampton Village; Montauk	\$175–\$200/SF asks; achieved 20–25% below asks; Montauk landlords "giving 20 to 30 percent off"	BROKER OPINION	[88]
2011	East Hampton; Southampton; Bridgehampton / Sag Harbor	Multiyear leases \$110–\$140 (EH), \$70–\$75 (Southampton), about \$50 (Bridgehampton, Sag Harbor)	BROKER OPINION	[89]
2012-04	Amagansett Main St (Outdoors store)	15-year lease not renewed; space later split between two tenants	HISTORICAL (rent undisclosed)	[125][74]
2013-05	Amagansett Main St (Gone Local)	Month-to-month tenant evicted; owner said she could afford "as much as \$5,000 per month" for a new space	HISTORICAL (tenant budget, not a rent)	[73]
2015–16	Amagansett Square	Four vacancies in late 2015; Square "filled to capacity" by May 2016	HISTORICAL	[74][75]
2016-02	East Hampton Village; Southampton	Average \$125/SF (EH); \$90 (Southampton)	BROKER OPINION	[90]
2016-12	Bridgehampton, 2510 Montauk Hwy	\$70/SF main floor plus taxes and CAM	ASK	[99]
2016-12 to 2017-06	207 Main St (subject)	Key money ASK \$625,000, then \$575,000; assignment closed 2017-06-12	HISTORICAL / EXECUTED (price undisclosed)	[10][13][15]
2017-07	Southampton	Main St \$140–\$150; Jobs Lane \$100–\$110; pop-ups (4–6 months) at "two-thirds to three-fourths of the annual asking rent"	BROKER OPINION	[91]
2019-05	74A Montauk Hwy	Honest Man opened Coche Comedor; "The company already owned the space"	HISTORICAL	[79]
2019-06	Southampton; Amagansett	Southampton asks fell from about \$110 to \$85 (Main) and \$50 (Jobs Lane); "Sag Harbor, Amagansett and Bridgehampton saw little turnover"; entry-level pop-ups \$75,000–\$100,000 a season	BROKER OPINION	[92]
2020	177 Main St	Building bought for \$2.825M	EXECUTED (sale)	[81]
2021-05	Amagansett Square (Hampton Chutney)	Renewal offer "almost triple" prior rent	HISTORICAL (offer)	[76]
2021	249 Main St	Seasonal pop-up "50K" for May 1–Sept 2021	HISTORICAL ASK	[47]
2021-09	East Hampton Village Main / Newtown	Average \$125–\$150/SF	BROKER OPINION	[93]
2021-11 / 2022-12	136 Main St; 11 Indian Wells Hwy	Sold for \$5.6M and \$5.2M to the same group	EXECUTED (sales)	[85][84]
2022-11	East End retail	About \$46/SF; +9.8% over 12 months; +62.2% versus a decade earlier (likely CoStar-sourced)	BROKER OPINION (market data)	[94]
2022–24	East Hampton Village	\$73, \$125 and \$145/SF retail leases	EXECUTED (D)	[53][54][55]
2023-01	177 Main St	Sold for \$4.45M	EXECUTED (sale)	[80]
2023-04	Newtown Lane, East Hampton	"over 14 offers... the price was \$250 per square foot" (rent or price ambiguous)	BROKER OPINION	[95]
2023-06	519–521 Montauk Hwy	Listed for sale at \$7.95M; vacant "for the last few years"; history as restaurant, gallery, wine bar; an earlier 7-Eleven lease was abandoned	HISTORICAL	[45]
2024-10	2095 Montauk Hwy	\$180,000/year base for 4,476 SF	ASK	[43]
2025-06	2095 Montauk Hwy	Rented; \$180,000 + \$40,000 NNN	CLOSED	[42]

Date	Location	Figure or event	Label	Source
2025-09	74A Montauk Hwy	Coche Comedor closed Sept 27, 2025 after six years	HISTORICAL	[78]
2025-09	716 Montauk Hwy, Montauk	1,450 SF units at \$9,750/month (about \$80.69/SF if per unit; basis ambiguous)	ASK	[96]
2026	74A Montauk Hwy	\$240,000 NNN + \$700,000 key money; \$175,000 seasonal	ASK	[28]
2026	11 Indian Wells Hwy; 136 Main St	\$35 / \$50 / \$65 NNN; Unit 1 \$192 NNN (withdrawn); assemblage for sale at \$19M	ASK	[33][34][35] [36][38]
2026-07	Amagansett west end	"Business boom"; new tenants at 136 Main St	HISTORICAL	[86]

Montauk notes. Montauk shows the deepest cyclical discounting in the record: 20–30% lease-ask cuts in 2009 [88], a sale-price cut at 716 Montauk Highway from \$8.9 million (2016) to \$6.7 million (March 2017) [97], and a Martell's / Montauk Fuels sale-ask series from \$10.5 million (2016) to \$5.475 million (2021) [127]. In 2019, Montauk restaurant prices were described as "not as steep" as elsewhere [79].

What the history shows. First, Hamptons retail rents are cyclical: East Hampton Village asks fell from about \$250 to \$110–\$140 between 2008 and 2011, then recovered [88][89]. Second, the post-2020 period is a step-up: an Amagansett renewal offer at about 3x (2021) [76], East End rents +9.8% in a year (2022) [94], and an Amagansett restaurant building up about 58% in under three years [81][80]. Third, **Amagansett turnover has been driven by landlord rent resets and sales, and vacated spaces have re-let within about a season** (Outdoors in 2012, Gone Local in 2013, Hampton Chutney in 2021, 177 Main in 2020–2023) [125][73][76][24]. The exception is 519–521 Montauk Highway, which is outside the walkable core [45]. Fourth, **seasonality is priced explicitly**: a pop-up season costs about two-thirds to three-quarters of a year's rent [91], and the 2026 74A seasonal ask is 72.9% of its annual ask [28]. A lease negotiated in 2002 or assigned in 2017 would have been set before the post-2020 step-up.

Comparable Adjustments

Normalization conventions (applied before the grid).

1. **Rent basis.** All comparables are compared on **annual NNN base rent per SF**. Where a comparable is gross or a pop-up figure, an NNN load is subtracted.
2. **NNN load assumption: \$7.00/SF (range \$5.00–\$8.75).** Sourcing: real estate taxes from broker-published tax bills run **\$1.38–\$3.22/SF** on small village commercial buildings [68][69][70][71]; the subject's own taxes are about \$2.96/SF [3]; taxes alone at 74A are \$4.92/SF [31]; the one stated all-in Amagansett NNN figure is **\$8.94/SF** at 2095 Montauk Highway [42]; taxes at 136 Main / 11 Indian Wells run about \$1.31–\$2.02/SF [36]; and a generic national benchmark puts retail NNN at \$4–\$8/SF [72]. Insurance and maintenance components (about \$1.00–\$2.50 and \$1.00–\$3.00/SF respectively) are **unsourced assumptions** and should be replaced with the subject's actual figures.
3. **Seasonal to annual.** A seasonal rent is converted to an annual-equivalent by **dividing by 0.67–0.75** (midpoint 0.71), following the broker rule that a 4–6 month season costs "two-thirds to three-fourths of the annual asking rent" [91], which 74A's 2026 asks confirm (72.9%) [28]. Scaling by months occupied is **not** used, because it overstates annual rent by 33–125%. The premium attaches to summer-only occupancy specifically: a 2015 Bridgehampton offering priced month-to-month at the same monthly rate as its annual lease (\$10,000 versus \$120,000 a year) [126].
4. **Transaction status (ask to achieved).** Asks on market more than about 180 days without a cut: **–10%** (74A, 11 Indian Wells, 9 Railroad Ave). Other current asks and stale historical asks: **–5%**. Closed leases: **0%**. The spread is moderate because the 2025–2026 market is tight [100][101], while 2009 spreads reached 20–25% [88] and long marketing periods here signal resistance [28][33].
5. **Market timing.** A 2021 figure is moved **+10%** to 2026, a conservative reading of East End rents rising 9.8% in a single year to November 2022 [94] and Long Island retail asks rising about 9% year over year in 2026 [113]. Figures from 2025–2026 are not time-adjusted.
6. **Size.** Smaller spaces command higher rent per SF: spaces under 1,000 SF cost "proportionately more" [87], and in 2026 a 400 SF Sag Harbor unit asks \$240/SF against \$125/SF for a 1,200 SF unit nearby [63]. Those trophy spreads imply an elasticity of about 0.3–0.6. This report uses **0.15**, so that size adjustment = $(\text{comparable SF} / 1,100)^{0.15} - 1$. Restaurant rent is driven more by seats and back-of-house than by frontage ("restaurants are valued on the basis of the number of tables" [98]), so a conservative elasticity is appropriate.
7. **Key money.** Key money is consideration paid for occupancy on top of base rent, and it is routine for turnkey Hamptons restaurant leases: \$225,000 to take over the Springs Tavern lease (2021) [117], \$500,000 for the Wölffer Kitchen Sag Harbor lease (2020) [116], \$250,000 at 17 S Edison [50] and \$700,000 at 74A [28]. It is converted to a per-SF annual amount on a straight-line basis over an assumed 10-year term, and **only 50% is treated as rent-equivalent**. The other 50% is assumed to pay for equipment and goodwill, since the 74A key money "would provide ownership of all of the equipment" [28]. The 50% share is an assumption.

Adjustment grid (seven strongest comparables). Percentages are adjustments to the comparable to make it equivalent to the subject: + means the subject is superior on that factor (comparable adjusted up); – means the comparable is superior (adjusted down). Property adjustments are summed and applied to the normalized rent.

Factor	74A Montauk Hwy	11 Indian Wells, 1st fl.	2095 Montauk Hwy	17 S Edison, Montauk	249 Main St (2021)	9 Railroad Ave, EH	7 Hill St, Southampton

Why each percentage was chosen.

Location, visibility and frontage. The subject is an at-grade corner storefront in the Main Street core, next to the Town lot and the library [2][4][18]. 74A also fronts NY-27 at the west end of the hamlet with highway visibility, so it gets 0 for location, with its pedestrian disadvantage captured under foot traffic. 11 Indian Wells sits at the Main Street corner but is entered by "a welcoming entry staircase from the sidewalk" [33], so the subject's at-grade storefront earns +5%. 2095 Montauk Highway is a roadside site about six miles east of the hamlet on the Napeague stretch [42]; +15% reflects the core-versus-off-core spread, which historically ran to 35–65% between village tiers [89] and is applied here conservatively. Downtown Montauk is treated as equivalent to Amagansett's core (0). East Hampton Village and Southampton Village have larger year-round trade areas than Amagansett, so 9 Railroad Ave and 7 Hill St each take –5%.

Foot traffic. The subject's pedestrian position (+5% versus 74A and versus 2095's drive-to stretch) and Railroad Avenue's secondary-street status (+5%) are modest. Downtown Montauk, near the beach among "some of the region's highest-grossing restaurant destinations" [50], has stronger summer volume (–5%).

Size. These figures come from the 0.15 elasticity formula: 2,830 SF gives +15%, 2,480 SF +13%, 4,476 SF +23%, 2,729 SF +15%, 3,000 SF +16%, 925 SF –3%, and 1,000 SF ground floor –1%.

Parking. The subject has no on-site parking, but adjoins a Town lot planned at about 185 time-limited spaces [25]. Dedicated on-site parking is superior: 74A has 31 spaces [28], 2095 has "an ample parking lot" [42] and 9 Railroad has "ample parking" [57], each –10%. 11 Indian Wells shares a 33-space lot among many tenants [36], so –5%. 17 S Edison has only a side alley for delivery and employee parking [50], so the subject's lot adjacency is superior (+5%).

Patio. 74A has an "expansive open patio" with bar and 30 outdoor seats [28], and 2095 has 450 SF of approved outdoor seating plus other outdoor space [42], each –5%. Where no outdoor space is stated (249 Main, 9 Railroad, 7 Hill St), the subject's patio earns +5%.

Kitchen and restaurant readiness. The subject's kitchen is very small [18], so comparables with large kitchens take –10%: 74A has an "oversized kitchen," "multiple walk-ins" and a basement legal prep area [28], and 17 S Edison has a "large kitchen" and a 112 SF walk-in freezer [50]. 2095 has double hoods but is delivered as a "clean white box" without furniture, fixtures or equipment [42]; these offset (0). Dry spaces with no wet-use entitlement (11 Indian Wells, 9 Railroad, 249 Main) take +10% for the subject's scarce wet use [10][12]; 7 Hill St permits only "modified wet uses" [64], so +5%. The wet-use premium is held to 10% because, within a given village, restaurant boxes often ask less per SF than small dry shops. Montauk's restaurant asks \$57.16 [50] against \$80.69 for dry retail [96], and Southampton's grocery space asks \$77.42 [66] against small shops above \$100 [65]. The difference largely reflects size and back-of-house area, and key money captures the turnkey value.

Condition and historic status. Comparables marketed as renovated or fully built-out take –5% against a subject whose operator recalls constant repairs and whose current condition is Unknown [18]: 74A ("Renovated in 2020... central A/C") [28], 11 Indian Wells ("full build-out," elevator) [33], 9 Railroad (renovated as a gallery) [57] and 7 Hill St (renovated complex) [65]. No adjustment is made for historic-district ARB constraints alone, since 11 Indian Wells and 249 Main share them [4].

Signage and zoning. All seven permit the comparable's current use; the subject's ARB sign limits are offset by its core position (0).

Storage and ancillary space. 74A includes a finished lower level, legal prep area and office (–5%) [28]. 2095 includes a three-bedroom apartment and 1.1 acres (–10%) [42].

Seasonality. This applies to the hamlet's market, not to the tenant's chosen hours. The Napeague stretch depends on resort traffic (+5% to the subject). Year-round village populations in East Hampton and Southampton (–5%) are an appraiser judgment consistent with the 2011 observation that the "prime shopping season is just three months" in summer-driven locations [89].

Key money. 74A: $\$700,000 \div 10 \text{ years} \div 2,830 \text{ SF} = \$24.73/\text{SF}$; 50% = $\$12.37/\text{SF}$, about 16% of the normalized $\$76.33$, rounded to **+15%** [28]. 17 S Edison: $\$250,000 \div 10 \div 2,729 = \$9.16/\text{SF}$; 50% = $\$4.58/\text{SF}$, about 8% of $\$54.30$, so **+8%** [50].

Market Rent Calculation

Method A: direct comparable adjusted range. The seven adjusted indicators range from **\$47.59 to \$83.25/SF NNN** (simple mean \$64.20). The three comparables scored 3 for comparability (74A, 11 Indian Wells first floor and 17 S Edison) are the most direct evidence, and they range from **\$61.36 to \$76.33**, mean **\$68.91** [28][33][50]. Method A indicates **about \$61–\$76/SF, central tendency about \$69**.

Method B: weighted comparable. Weights are not arbitrary. Each comparable's weight is the product of three factors fixed before calculation: **tier** (Tier 1 = 3, Tier 2 = 2, Tier 3 = 1, reflecting proximity to the subject's submarket and use); **evidence status and grade** (closed lease = 1.25, reduced from 1.5 because the 2095 price is "Unverified"; current B-grade ask = 1.0; B-grade ask with internal conflict = 0.75; historical C-grade = 0.5; D-grade = 0.25, none used); and **comparability score** (1–5).

Comparable	Adjusted \$/SF	Tier wt.	Evidence wt.	Score	Weight	Share	Contribution
74A Montauk Hwy	\$76.33	3	1.0	3	9.0	31.6%	\$24.10
11 Indian Wells Hwy, 1st fl.	\$69.03	2	1.0	3	6.0	21.1%	\$14.53
2095 Montauk Hwy	\$49.46	2	1.25	2	5.0	17.5%	\$8.68
17 S Edison St	\$61.36	1	1.0	3	3.0	10.5%	\$6.46
249 Main St (2021)	\$47.59	2	0.5	2	2.0	7.0%	\$3.34
9 Railroad Ave	\$83.25	1	1.0	2	2.0	7.0%	\$5.84
7 Hill St	\$62.36	1	0.75	2	1.5	5.3%	\$3.28
Total					28.5	100%	\$66.24

Arithmetic: $(76.33 \times 9 + 69.03 \times 6 + 49.46 \times 5 + 61.36 \times 3 + 47.59 \times 2 + 83.25 \times 2 + 62.36 \times 1.5) \div 28.5 = 1,887.75 \div 28.5 = \mathbf{\$66.24/SF\ NNN}$.

Robustness. Treating 74A's key money as entirely equipment (no key-money adjustment) lowers 74A to \$64.88 and the weighted result to **\$62.62**. Halving the ask-to-achieved discount for 74A and 11 Indian Wells (–5% instead of –10%) raises it to **\$68.39**. Reasonable alternative assumptions therefore move Method B between about **\$62.60 and \$68.40**.

Method C: market range low / midpoint / high. This uses the distribution of the seven adjusted indicators: the 25th percentile is **\$55.41**, the median **\$62.36** and the 75th percentile **\$72.68** (linear interpolation of the sorted values \$47.59, \$49.46, \$61.36, \$62.36, \$69.03, \$76.33, \$83.25).

Reconciliation.

Method	Low	Central	High
A: direct (score-3 comparables)	\$61.36	\$68.91	\$76.33
B: weighted	\$62.62 (alt.)	\$66.24	\$68.39 (alt.)
C: distribution	\$55.41	\$62.36	\$72.68
Reconciled ESTIMATE	\$60.00	\$66.00	\$72.00

The **low end of \$60** sits above Method C's 25th percentile (\$55.41) because the two indicators below \$50 carry the largest normalizations. 2095 is a 4,476 SF off-core white box with an apartment that needs a +23% net adjustment, and 249 Main is an ambiguous 2021 pop-up figure that passes through three conversions. The low end stays just below Method A's lowest direct-evidence value (\$61.36) to remain conservative. The **high end of \$72** matches Method C's 75th percentile (\$72.68) and sits below the 74A indicator (\$76.33), which depends on an ask and on a key-money allocation assumption. The **midpoint of \$66** rounds Method B (\$66.24) and lies between Method A's central \$68.91 and Method C's median \$62.36.

Recommended market range (ESTIMATE): \$60–\$72/SF/year NNN base rent, midpoint \$66/SF. For 1,100 SF:

	\$/SF/yr (NNN)	Annual	Monthly	Gross-equivalent \$/SF (+\$7.00)	Gross-equiv. monthly
Low	\$60.00	\$66,000	\$5,500	\$67.00	\$6,142
Midpoint	\$66.00	\$72,600	\$6,050	\$73.00	\$6,692
High	\$72.00	\$79,200	\$6,600	\$79.00	\$7,242

Monthly = \$/SF × 1,100 ÷ 12 (for example, \$66 × 1,100 = \$72,600; ÷ 12 = \$6,050).

Sensitivity Analysis

Implied rent for 1,100 SF at alternative market rates (NNN base).

\$/SF/yr	Annual rent	Monthly rent	Change vs. current \$5,000/month
\$50	\$55,000	\$4,583	–8.3%
\$55	\$60,500	\$5,042	+0.8%
\$60	\$66,000	\$5,500	+10.0%
\$65	\$71,500	\$5,958	+19.2%
\$70	\$77,000	\$6,417	+28.3%
\$75	\$82,500	\$6,875	+37.5%
\$80	\$88,000	\$7,333	+46.7%
\$85	\$93,500	\$7,792	+55.8%
\$90	\$99,000	\$8,250	+65.0%
\$100	\$110,000	\$9,167	+83.3%

The current rent corresponds to about \$54.55/SF; it would be at market only if market rent were about \$55/SF NNN. That level lies below the reconciled range and is supported only by the two lowest-weighted indicators (2095 Montauk Highway and 249 Main Street).

Current rent per SF and gap to market at alternative building areas.

Building area	Current \$/SF/yr	Market monthly at \$60 / \$66 / \$72	Current vs. market midpoint	Current vs. market low
1,000 SF	\$60.00	\$5,000 / \$5,500 / \$6,000	–9.1%	0.0% (at market low)
1,100 SF	\$54.55	\$5,500 / \$6,050 / \$6,600	–17.4%	–9.1%
1,200 SF	\$50.00	\$6,000 / \$6,600 / \$7,200	–24.2%	–16.7%

Area is the single most sensitive unverified input. If a measurement showed about 1,000 SF, the current rent would sit at the low end of the market range and the below-market finding would narrow to about 9% against the midpoint (marginally less after the size elasticity raises market \$/SF by about 1.4% for a smaller space). At 1,200 SF the gap widens to about 24%. **Lease type is the second.** If the \$5,000 is gross, the subject's \$54.55/SF compares with a gross-equivalent midpoint of \$73/SF, about 25% below; equivalently, its net-equivalent of about \$47.55/SF is about 28% below the \$66 NNN midpoint.

Tenant Rent vs. Market

Finding: BELOW MARKET.

Based on the weighted comparable analysis, estimated market rent is \$60–\$72/SF/year (NNN), implying \$5,500–\$6,600/month; the existing \$5,000/month is approximately 17% below the estimated market midpoint of \$6,050/month (\$54.55 versus \$66.00/SF). It is about 9% below the low end of the range and about 24% below the high end. If the lease is gross, the shortfall is about 25% on a gross-equivalent basis.

The finding is honest about the evidence base, which is thinner and lower than a reading of Amagansett asking rents alone would suggest. **The most relevant Amagansett restaurant ask is \$84.81/SF NNN at 74A Montauk Highway, and it comes with \$700,000 of key money [28].** Main Street district dry space asks \$65/SF NNN [33]. But **the only closed Amagansett food-service lease is about \$40/SF base in Napeague** for a much larger, off-core, white-box space with an apartment [42]. Asking rents of \$65–\$85/SF in this market have not cleared quickly [28][33], and the subject's tiny kitchen, condition history and lack of on-site parking [18] are genuine market discounts that are already built into the grid. After those adjustments, the defensible range is **\$60–\$72**, not the \$65–\$85 that raw asks imply. The direction of the finding is reinforced by independent qualitative evidence: the 2017 key money for this leasehold [15], the "almost triple" Amagansett Square renewal [76], and a tight post-2020 market [100][101].

Landlord Negotiation Position

Position	Basis	\$/SF/yr (NNN)	Monthly	Annual	Premium over \$5,000
Conservative (lowest market-supported rent the landlord can credibly defend)	Low end of reconciled range; just below the lowest score-3 comparable (\$61.36)	\$60.00	\$5,500	\$66,000	+10%
Fair market midpoint	Method B weighted result (\$66.24), rounded	\$66.00	\$6,050	\$72,600	+21%
Aggressive (strongest comparable evidence)	74A Montauk Hwy adjusted indicator (\$76.33), the only Tier 1 food-service comparable	\$76.36	\$7,000	\$84,000	+40%

How far below market the current rent is. At 1,100 SF and NNN, the current rent is **\$500/month (\$6,000/year) below the conservative position, \$1,050/month (\$12,600/year) below the midpoint and \$2,000/month (\$24,000/year) below the aggressive position.** Over a five-year term, the midpoint gap is about \$63,000 before escalations (ESTIMATE).

Position on the tenant's request for a reduction. The evidence identifies no adverse change in market-rent factors that would support a **permanent** reduction below \$5,000/month, which is already below the reconciled market range. The aggressive position rests on an ask with key money and on a 50% key-money allocation assumption; it is a credible opening only if the landlord is prepared to defend those assumptions. The midpoint is the recommended reset target at renewal or at any re-opening of terms. The conservative figure is the floor that the evidence can defend against a well-advised tenant's broker.

Structural alternatives.

- **Temporary concession, not a permanent reset.** If the tenant documents hardship, a deferral of part of the rent for a defined period (for example, one off-season), repaid over the following season,

preserves the rent level. Relief should be conditioned on delivery of store-level sales and profit-and-loss statements. The 2009 local precedent of "teaser rates, giving a discount for the first two or three years with the stipulation the rent will go up later" shows the market has used front-loaded concessions with built-in step-ups [88].

- **Permanent reset to market at renewal.** If the lease is near expiry or has a renewal option, the market range supports resetting to \$5,500–\$6,600/month, with "annual increases" as the stated Hamptons norm [98]. No Hamptons source specifies an escalation percentage.
- **Percentage rent.** Percentage rent is not documented as common for small Hamptons storefronts; key money is the usual mechanism for capturing location value. A public precedent exists: the towns' 2011 Poxabogue restaurant RFP set a fixed rent plus 10% of gross if greater [131]. A structure of \$5,000 base plus a percentage of gross sales above a breakpoint would let the landlord share in a strong season without raising fixed rent. It requires audited sales reporting.
- **Term extension in exchange for stability.** "Landlords want five years with an option to renew and annual increases" [98]. Granting a longer term at the current rent in exchange for scheduled step-ups to market, a personal or corporate guaranty, and year-round or minimum operating covenants trades rent level for occupancy security. Given the chain's contraction, this may be worth more to the landlord than a higher face rent.
- **NNN conversion.** If the current lease is gross, converting to NNN would shift the subject's taxes (about \$3,261/year, about \$272/month) [3] plus insurance and maintenance to the tenant. That adds about \$5–\$8.75/SF of value (ESTIMATE) without changing headline base rent. **NNN is the overwhelming quoting convention in 2026 Hamptons storefront and restaurant listings:** about 16 of the readable listings say "+ NNN" and none says "gross" [28][33][50][51][56][57][58][62][63][64][66].

Potential Tenant Arguments and Responses

Governing definition. Market rent is "The most probable rent that a property should bring in a competitive and open market under all conditions requisite to a fair lease transaction, the lessee and lessor each acting prudently and knowledgeably, and assuming the rent is not affected by undue stimulus," with lessee and lessor "typically motivated" and the rent reflecting terms "typically found in that market, such as permitted uses, use restrictions, expense obligations, duration, concessions" [109]. The same Appraisal Institute article distinguishes "use rent" tied to a specific use and says it "is never synonymous with market rent" [109]. The federal banking definition of market value at **12 CFR § 323.2(h)** uses the same framework: "the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus," with buyer and seller "typically motivated" [110]. Under both definitions, a **MARKET-RENT factor** affects what any typical tenant would pay for these premises. A **TENANT-ECONOMICS factor** is specific to this operator's results and does not change market rent.

#	Tenant argument	What the evidence shows	Factor type	Landlord response
1	"Our business is struggling."	The chain contracted: Short Pump, VA closed in 2023 [26]; the University of Richmond unit in 2024 [27]; Stony Brook and New Hyde Park are listed closed [129][130]. Five stores remain [21]. No bankruptcy found	TENANT-ECONOMICS	Market rent is what a "typically motivated" tenant would pay [109]. The same space drew "several serious inquiries" in a day and \$575,000–\$625,000 key-money asks [10][13]. Request sales and profit-and-loss data before considering any temporary, repayable deferral
2	"Revenue is seasonal."	The store closed December–March as early as 2019 [121]; "Closed for the winter" in 2023 [24]; Coche Comedor cited seasonal difficulty [78]	MARKET (hamlet seasonality), already embedded in comparables and in the 2017 key-money price; the Fri–Mon schedule is TENANT-ECONOMICS	Seasonality is long-standing and was known when the leasehold was bought. Comparable rents already reflect it, and East End vacancy has been low since COVID [100]
3	"Construction disrupted us."	The 2026 brick-sidewalk work was on the south side, Hedges Lane to Amagansett Square's west entrance, targeted for May 1–15, 2026 [105][104]. The subject appears to be on the north side (adjacent to 203 Main, which 27east places on the north side) [104]. Street lighting is still in engineering [120]	At most a temporary abatement question under the lease; the finished work is a MARKET positive	Ask for dated evidence of obstruction at the subject's frontage. Any accommodation should be a one-time credit for proven days, not a base-rent cut. The Town justified the work by "increasing foot traffic" [104]
4	"Labor and food costs are up."	Long Island minimum wage \$17.00 in 2026 [106][107]; frozen for 2027 [106]; more than 90% of operators cite cost pressures [108]	Industry-wide TENANT-ECONOMICS	Every competing operator bears these costs; they reach market rent only through comparable rents. New entrants chose Amagansett despite them [86][115]
5	"Foot traffic is down."	Officials cite "increasing foot traffic" [104]; a west-end "business boom" in 2026 [86]; Suffolk sales tax +9.2% in H1 2026 [103]. No pedestrian counts exist; national restaurant traffic was weak in 2025 [108]	MARKET factor, but local evidence runs against the tenant	Ask for the tenant's transaction counts. A decline that coincides with Fri–Mon hours and new café competition points to operator factors

#	Tenant argument	What the evidence shows	Factor type	Landlord response
6	"The building is in poor condition."	No public evidence of current condition; a history of repairs in 2002–2017 [18]; cosmetic refresh in 2020 [20]	MARKET factor only if below comparable premises and a landlord obligation	Partly valid and already priced: the grid applies –5% against renovated comparables. Check the lease's repair allocation and inspect. Fix landlord items directly rather than cutting rent permanently
7	"The space is small."	About 1,100 SF, disclosed in 2016 [9]; the patio extends seasonal seating [9]	MARKET attribute handled in per-SF analysis	Small spaces command higher rent per SF [87]. Size was fixed and known when the tenant bought the leasehold. The size adjustment already favors the tenant's position relative to trophy small-unit rents
8	"Parking is limited."	No on-site parking; the 2020 Town plan called for about 185 spaces in the adjoining lot [25]; more parking is planned on the Field property [114]	MARKET attribute	Partly valid and already priced (–5% to –10% against comparables with on-site parking). Public parking capacity was planned to grow after the tenant's 2017 entry (completion not verified), and a take-out café is among the least parking-dependent uses
9	"There is more competition."	New entrants: Doubles (2022) [24], Rowdy Hall (2023) [83], Meeting House [119], Sett Coffee and Jamagansett (2026) [86], Amagansett Coffee Co. (2026) [115]	Mainly TENANT-ECONOMICS (concept positioning); entry also signals MARKET demand	New capital entering the hamlet shows operators value Amagansett food locations. Loss of share to rivals is not a property defect
10	"General economic conditions are weak."	Suffolk sales tax +9.2%, Long Island +7.1% (H1 2026) [103]; Hamptons median price +18%, record \$39M retail sale (2026) [102]; limited supply [101]. Caveats: growth partly inflation and "may not last" [103]; national restaurant traffic weak [108]	MARKET factor; current evidence supports holding rent	The tenant's affluent seasonal customer base is strong by every primary indicator found. Softness is national and skewed toward lower incomes [108]

Market factors that genuinely justify a discount, quantified. Five subject attributes are real market discounts. They are why the reconciled midpoint (\$66) sits about 22% below the 74A ask (\$84.81) rather than at it. Against the Tier 1 restaurant comparable, the grid applies: **parking –10%** (no on-site spaces), **kitchen –10%** (a kitchen "not much bigger than a bathroom" [18]), **condition –5%** (repair history; current condition Unknown), **patio –5%** and **storage –5%**, a total of **–35 percentage points**, partly offset by the subject's smaller size and pedestrian position. Two further factors are noted but not separately charged. The **undersized, nonconforming lot** (about 2,178 SF against a 3,000 SF minimum, at the 50% coverage cap [6]) prevents expansion, which would matter mainly to a tenant seeking more seats; it is embedded in the size and kitchen adjustments, and a further 0–3% is defensible if a tenant's broker presses it. **Chain contraction** affects the landlord's credit risk, not market rent, but it is a legitimate reason for the landlord to prefer the conservative position (\$5,500) with a guaranty over the aggressive one. The tenant's **Fri–Mon operating schedule** is an operator choice and does not reduce market rent.

Conclusion

The question is not whether 207 Main Street could command trophy-village rent; it cannot, and nothing in this assessment relies on that. The question is whether a typically motivated, well-advised food-service operator would pay more than \$54.55/SF for this small, entitled, historic Main Street box next to the hamlet's

main parking lot. The weight of the evidence says yes, but by roughly \$5–\$18/SF rather than by \$30 or more. The landlord's strongest argument is not an asking rent. It is the documented market behavior around this exact space: a leasehold that commanded six-figure key money and multiple inquiries, in a hamlet where vacated food spaces re-let within a season and where a neighboring landlord priced a legacy restaurant renewal at about three times its old rent.

The weakest link in the landlord's case is that the record contains only one closed Amagansett food-service rent, and it is low. A tenant's broker will build its case on 2095 Montauk Highway and on the subject's physical limits. The reconciled range answers that by pricing those limits explicitly rather than ignoring them. Before any negotiation, three facts held by the landlord or obtainable at modest cost would change the confidence level more than further market research: the lease's type and expense allocation, a measured floor area, and whether the current lease is the one assigned in 2017.

Which conclusions rest on which grades. The **core market-rent conclusion** rests on B-grade evidence: current broker listings with detailed terms [28][33][50][57][64], a broker-reported closed lease [42], and B-grade press for the 2016–2017 key-money assignment [10][13][15]. The 2021 pop-up [47] is C-grade and carries 7% weight. **Subject facts** on ownership, assessment, zoning, use table and historic status rest on A-grade government records [1][2][4][5][6][7]; the 1,100 SF area rests on B and C sources [9][18]; the tax figure is D-grade [3]. **No D-grade source is used as a weighted comparable or as the sole support for any figure in the conclusion.** D-grade items are used only as context or ceilings (Traded.co East Hampton leases [53][54][55], 136 Main Unit 1 terms [38], the 74A tax figure [31], Westhampton key money [61], tenant closures [129][130]) or to corroborate B-grade facts. Market-condition findings rest on A-grade (sales tax [103], wage law [106][107]), B-grade (trade press [100][101][102][108]) and C-grade (local press) sources.

Research Limitations

Blocked databases and sites. LoopNet, Crexi, CityFeet, Showcase, Realmo, CommercialCafe, PropertyShark (direct download), Traded.co, BizBuySell and BizQuest returned HTTP 403 to automated access; their figures appear only as search snippets and are graded D. The Wayback Machine's CDX search was blocked by the egress proxy, its availability endpoint returned no snapshot for the 2016 Elliman listing of the subject, and no archived listing captures could be retrieved. ecode360 (Town Code) and Town of East Hampton PDFs returned 403; Town documents were read from archived copies where available. NY Courts, Yelp, Toast and BLS pages were also blocked.

No executed Amagansett rents. No executed Amagansett commercial rent is public for 2014–2026. The single closed food-service lease in the 11930 ZIP (2095 Montauk Highway) is broker-reported and flagged "Unverified" [42]. The conclusion therefore relies on adjusted asking rents, which carry an assumed 5–10% ask-to-achieved discount.

Subject data gaps. The 1,100 SF area is unverified by any government record. Lease type, expense responsibilities, term, escalations, options, repair allocation and guaranty are Unknown. Whether today's lease is the one assigned in 2017 is Unknown. HVAC, basement, frontage, seat count, certificate of occupancy, year built and current condition are Unknown, and the CB zoning of the parcel is inferred rather than confirmed on a zoning map.

No paid data. No CoStar, CompStak, Reonomy or broker lease-comparable database was available. No Amagansett pedestrian counts or Hamptons-specific asking-to-executed spread statistics exist in public sources.

Conflicting figures flagged.

- Behind the Hedges and Dan's Papers printed the subject's address as "270 Main Street," an evident typo; all other sources and the listing link give 207 [11][12].
- The key-money ask is reported as \$625,000 by 27east [15] and \$575,000 by Behind the Hedges [13]; the closing price is undisclosed.
- 7 Hill St carries two rents: \$71.35/SF on its unit page versus \$90.81/SF implied on the combined-unit page [64][65]. This report uses the lower figure.
- 2095 Montauk Highway's closed price is flagged "Unverified" by Compass, and its page header displays "\$180,000/mo" against "\$180,000/yr" in the listing text [42].
- The broker's name appears as both "Robert" and "Richard" Kohr [10][12].
- 62 Montauk Highway's size and parking conflict between sources [61].
- 249 Main Street's "50K" has no stated basis [47].

Assumptions that drive the result. The \$7.00/SF NNN load (insurance and maintenance components unsourced), the 0.15 size elasticity, the 50% non-equipment share of key money, the 10-year key-money amortization, the 0.71 seasonal factor, the 5–10% ask-to-achieved discount and the comparable weights are all appraiser judgments. They are stated so that a reviewer can substitute alternatives; the robustness test moves the weighted result between about \$62.60 and \$68.40.

Recommended next steps, in order of value.

1. Pull the **landlord's own lease file** to confirm lease type, expense allocation, term, escalations, renewal or reset clauses, and whether the current lease is the 2017 assigned lease.
2. Obtain the **Town assessor property record card and certificate of occupancy** for 300-171-1-18 (building area, year built, approved seats, permitted use) and confirm CB zoning on the Town zoning map.
3. **Measure the premises** (gross and usable SF, patio and storage separately).
4. Search the **Suffolk County Clerk** for any recorded memorandum of lease for 207 Main Street and for Amagansett restaurant leases (terms over three years may be recorded).
5. Ask **Douglas Elliman** (Robert Kohr, Lori MacGarva) for the 2017 transaction file, and ask HCRE for the rent behind its "Napeague Stretch Wet Use" and "East Hampton Wet Use" closed deals [118].
6. Purchase a **CoStar or CompStak** lease-comparable pull for the South Fork, food-service, 2022–2026.
7. Commission a **site inspection** documenting building condition, kitchen infrastructure (hood, grease trap, septic), HVAC and the frontage, and confirming which side of Main Street the 2026 sidewalk work affected.

Market Rent Conclusion

Landlord decision page. Figures are ESTIMATES from the reconciled comparable analysis in this memorandum; NNN base rent at 1,100 SF unless stated.

MARKET RENT CONCLUSION	
Estimated market rent	\$60–\$72/SF/year (NNN base rent)
Estimated monthly market rent	\$5,500–\$6,600/month
Best-supported midpoint	\$6,050/month
Current rent	\$5,000/month
Current discount/premium to market	17% discount (current rent is about 17% below the \$6,050 midpoint; about 9% below the low end)
Recommended landlord negotiating position	\$6,050/month (reset target at renewal; no permanent reduction below \$5,000 in the interim)
Minimum market-supported position	\$5,500/month
Confidence level	Low (no executed Amagansett rent is public, and the 1,100 SF area and the lease type are unverified; the direction of the finding is better supported than its size)

Would an independent commercial real estate broker or appraiser likely view \$5,000/month as below-market, assuming the verified property characteristics? Yes, most likely as **modestly below market**, though not dramatically so. An independent reviewer would weigh the Tier 1 restaurant ask of \$84.81/SF NNN with \$700,000 key money [28], the \$65/SF NNN ask for dry Main Street district space [33] and the documented key-money premium paid for this exact leasehold in 2017 [15]. Against these, the reviewer would set the low closed Napeague lease [42] and the subject's small kitchen, repair history and lack of on-site parking [18]; on balance, that supports a market rent near \$60–\$72/SF against the current \$54.55/SF. The reviewer would condition that opinion on confirming the floor area and the lease type. At a measured 1,000 SF on a NNN lease, the current rent would sit at the low edge of market. At 1,100 SF or more, or on a gross lease, it would be clearly below market.
